REQUIREMENT HTA/SI/R26/57: Confirm reported missile launching sites in the Rrshen, Skutari, and Saseno Island areas.

REMARKS:

All pertinent available photography covering three Albanian areas has been searched for reported guided missile activity.

A comparison of recent photography covering Saseno Island with aerial views taken [] reveals little apparent change with the exception of four new irregularly-shaped pads or revetments on the north end of the Island. These installations, which are oriented toward the west, seem incomplete, and there is no recognizable sign of missile activity.

Photography covering the Skutari and Rrshen areas reveals nothing indicative of missile activity.
